Github Page: <https://github.com/jyz022020>

### Information:

A motivated and energetic person who skilled in Java and HTML, and also arm myself with more breadth of knowledge of computer science, seeking to get a chance to learn more about coding.

### Projects in Bootcamp

UC Berkeley Extension Feb 2022-July 2022

#### Project 1 Night Out Planner

- Create an interactive and responsive application which has a polished UI.
- Use two server-side APIs.
- Use Handlebars.js as the templating engine.
- Skills and technologies: deployment, client-side storage, interactivity, responsive design, polished UI.
- Link: <https://jyz022020.github.io/Project1-Night-Out-Planner/>

#### Project 2 Astrozod

- Use Node.js and Express.js to create a RESTful API.
- Use Handlebars.js as the templating engine.
- Use MySQL and the Sequelize ORM for the database.
- Have both GET and POST routes for retrieving and adding new data.
- Skills and technologies: server-side JavaScript, RESTful APIs, databases, object-relational mapping, environment variables, templating, and authentication.
- Deployed link: <https://astrozod.herokuapp.com/>

### Coding relative courses:

University of Washington, Seattle

CSE 142: Computer Programming I

Winter 2020

CSE 143: Computer Programming II

Spring 2021

### Education:

University of California, Irvine

2013-2017

BA degree in Economics

### Other relative courses:

North Seattle College

Calculus I,II

Winter 2020- Spring 2021
